

ARYAN SHINDE

Pune, India 400067 | +91 9004723743 | shindearyan1911@gmail.com

SUMMARY

Third-year Computer Science Engineering student with experience in AI/ML, full-stack development, and hackathons. Skilled in developing web applications and applying machine learning techniques to solve real-world problems. Strong team player with experience in project management, collaborative development, and version control using Git. Passionate about building innovative, scalable, and practical technology solutions.

SKILLS & PROFILES

Technical Skills

- Web development
- Full-stack development
- Machine learning techniques
- Version control systems

Core Competencies

- Team management
- Leadership skills
- Critical thinking
- Team collaboration

EDUCATION AND TRAINING

2028 Bachelor Of Technology: Computer Science Engineering

MIT World Peace University - Pune

2024 Junior College (HSC)

Pace Junior College - Kandivali, Mumbai

2022 High School (ICSE)

Oxford Public School - Mumbai

PROJECTS

SignBridge | Python, ML, Computer Vision, ANN, MediaPipe, React

- Developed a real-time Indian Sign Language (ISL) recognition system using MediaPipe hand landmarks and a Keras MLP model.
- Trained the MVP to recognize 35 static ISL classes (A-Z, 1-9) from camera input with 98.4% classification accuracy.
- Implemented wrist-relative landmark normalization creating a lightweight 42-feature spatial vector invariant to distance.
- Integrated AI-based sentence smoothing and multilingual speech synthesis (English, Hindi, and Marathi via Web Speech API).
- Engineered an interactive ISL Practice & Learn mode; built using React, Vite, Tailwind CSS, Flask, and TensorFlow/Keras.

FasalMitra | Python, Flask, MongoDB, Redis, ResNet Deep Learning

- Architected an agricultural telemetry and diagnostic platform utilizing distributed microservices and ResNet models.
- Built performant Flask RESTful inference endpoints with MongoDB persistence and sub-millisecond Redis query caching.
- Integrated service routing and authentication through a secured Nginx API reverse-proxy gateway.

CareerCompass AI | TypeScript, Next.js, React, Firebase, Google Gemini API

- Engineered an AI career roadmap platform generating personalized skill trajectories and milestones based on user goals.
- Integrated Google Gemini API via Genkit for guided career counseling and structured curriculum generation.
- Implemented Firebase Authentication and Firestore database for synchronized multi-device roadmap tracking.

ACHIEVEMENT

- Ranked 4th in Pune for Yi Future 6.0 Hackathon / Innovation Challenge
